DEPTH REDUCING UNDERWATER POOL PLATFORMS			Dimensions (length x width x height)	Product code	
Depth reducing pool platform PF	Depth reducing pool platform with side PF	Pool island PF1000/1000			
			Made to measure	PF	
			100 x 100 x 70 cm, 22kg	PF1000/1000	

Pool platforms are solid and stable platforms that reduce the pool depth and help with learning to swim and practice aqua fitness.

Pool platforms have been designed to help new swimmers learn to swim in deeper water or where visitors are unable to touch the bottom of the pool.

Pool platforms are made especially for swimming schools, commercial pools, spas and hospitals. Pool platforms give confidence and encourage students to learn to swim faster and can increase the use of the pool.
